DETAILED ACTION

Claims 1-34 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 10, 12, and 14, drawn to a first knowledge database, classified in class 707, subclass 100.
- II. Claim 2, drawn to a second knowledge database, classified in class 707, subclass 100.
- III. Claim 3, drawn to a third knowledge database, classified in class 707, subclass 100.
- IV. Claim 4, drawn to a fourth knowledge database, classified in class 707, subclass 100.
- V. Claim 5, drawn to a fifth knowledge database, classified in class 707, subclass 100.
- VI. Claims 6-9, 11, 13, and 15 drawn to a sixth knowledge database, classified in class 707, subclass 100.
- VII. Claim 16-18, drawn to a method for displaying objects and relations, classified in class 707, subclass 104.1.
- VIII. Claims 19-26, drawn to a first method for constructing a knowledge database, classified in class 707, subclass 102.
- IX. Claims 27-30, drawn to second method for constructing a knowledge database classified in class 707, subclass 102.

Art Unit: 1631

- X. Claim 31 and 33, drawn to a method for generating a knowledge database classified in class 707, subclass 102.
- XI. Claim 32 and 34, drawn to a method for displaying a graph classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

The knowledge database products of Groups I-VI can be shown to be distinct as they each require different content. The methods of Groups VII-XI can be shown to be distinct as they have different methods steps and/or goals. The knowledge database products are not required by any of the methods and could be used in multiple methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the requirement for non-coextensive non-patent literature searches, restriction for examination purposes as indicated is proper.

Applicant is directed to the Trilateral Project WM4 Report on Comparative Study on Protein 3-Dimensional (3-D) Structure Related Claims, particularly the sections concerning data and databases, at: www.uspto.gov/web/tws/wm4/wm4_3d_report.htm.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1631

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
